# Full-Stack Developer

I started my career as a freelancer, focusing on building modern and efficient web applications. Over time, I honed my expertise in TypeScript, React, Next.js, Tailwind, Node.js, Fastify and PostgreSQL, crafting scalable solutions and intuitive user experiences. I enjoy solving complex problems, optimizing performance, and creating maintainable code that enhances usability.

## • Experience

### Freelancing

Full Stack Developer

October, 2024 – Present

## • Projects

FormWizard [\(View project\)](#)

Form Wizard is a form builder designed to streamline the process of creating forms with ease. With a wide array of features including drag and drop functionality, analytics visualization, real-time preview, and secure user authentication, Form Wizard empowers you to create professional forms effortlessly.

Cosmicus [\(View project\)](#)

Cosmicus is a gamified application designed to teach computational thinking in a fun and engaging way. With a space-themed adventure, players learn core problem-solving skills through interactive challenges and missions.

Athanasio Dermatologia [\(View project\)](#)

This is a freelance project for Doutora Andressa, a dermatologist, designed to showcase her expertise, treatments, and patient testimonials in a visually appealing and user-friendly landing page.
